NOTICE TO CORRESPONDENTS.

1. All orders should be legibly written on a separate sheet of paper, and not mixed up with the body of the letter.
2. It is always advisable to send orders in for nursery stock as early as possible, as those who come first are served first, and we make it a rule to fill orders in rotation as received.
3. In ordering, please state whether substitution will be permitted, as we feel at liberty, when no instructions accompany the order, to replace with other sorts, as nearly similar as possible. Those not acquainted with the different varieties will do well to leave the selection to us, as we will send them only such varieties as we know are adapted to their locality.
4. Our packing and labeling is as perfect as possible, and we charge for the same only to cover the cost of material. All goods are delivered at the railway or express office free of charge.
5. State distinctly how you wish us to ship—by freight or express; also designate the route, otherwise we will use our own discretion in forwarding.
6. After delivering to the carriers we cannot hold ourselves responsible for any loss or injury to trees or plants after they have been carefully packed and shipped; but we will do everything in our power, if any loss should occur, for the protection and recovery of our customers' property.
7. Orders to be sent by express, C. O. D., will be filled, provided one-quarter of the amount is sent with the order.
8. If any mistakes are made in filling orders, we will cheerfully rectify the same, but must respectfully request our customers to notify us at once, or, at the most within ten days after the receipt of the goods.
9. Orders from unknown correspondents must be accompanied with a remittance or satisfactory references.
10. We uniformly tie our trees in bundles of 10, and grape vines in bundles of 25, and we suggest to our patrons to make their orders for assortments as far as possible in multiples of these numbers.
11. Articles mentioned in the following list will be furnished at prices named as follows: 5 and under 30, at the 10 rate; 30 and under 300, at the 100 rate; 300 or more at the 1000 rate. Less than 5 of a variety at the single rate.

Address all communications to

GEO. C. ROEDING, Manager,
Fancher Creek Nursery, Fresno, Cal.

→ GUARANTEE ←

While we exercise the greatest care and diligence to have all our trees, etc., true to the label, and hold ourselves in readiness, on proper proof, to replace all such trees, etc., that may prove untrue to the label, free of charge, or to refund the amount paid; it is mutually understood and agreed to, however, between the purchaser and ourselves that our guarantee of genuineness shall in no case make us **liable** for any sum greater than that originally paid us for said trees, etc., that prove untrue.

—•••REMARKS•••—

We take pleasure in presenting to our patrons our Price List for the season of 1894 and 1895. Our facilities for handling trees have been very much improved, having established our packing grounds in Fresno, on H street, between Tuolumne and Stanislaus streets, we will be in the position to pack and ship orders more promptly than heretofore. We would respectfully request parties wanting trees to inspect our large and fine assortment and satisfy themselves as to the quality of the stock before making purchases elsewhere.

Our tree depot for delivering local orders will be located at the old stand, on J street, near Fresno, opposite the Barton Opera House. Our office is at 1152 J street. Telephonic communication with the nursery.

The favorable spring and cool summer have been conducive toward producing an excellent stock of trees, which are entirely free from all injurious insect pests and diseases. It is a rule of this establishment to send out no tree or plant which we would hesitate to plant ourselves.

A few hints regarding the handling of trees on arrival at their destination will probably be of value to amateurs in the business :

Immediately on receipt of the trees, open up the bale or box, remove the packing from the roots, cut the rope binding each bundle, spread the trees out in a trench, slope them at an angle of about 45 degrees and cover the roots with soil and carefully work it in between them ; then water thoroughly, and they will remain in good condition until ready to plant in the orchard.

Should trees become dry or shriveled from delay in being promptly forwarded by the carriers, bury them in moist soil, covering them up completely, then wet the ground thoroughly ; allow them to remain for several days, and when the bark appears to be fresh and bright, plant at once. Never place them in water, as it will cause the bark to rot, and will often kill the tree.

In planting, never bend the roots, but dig the hole large enough to receive them freely. Fill in with surface soil first, and pack it firmly around the roots. After the tree is planted, a couple of buckets of water poured around the tree will settle the dirt more thoroughly than any other method which could be adopted.

For further and more explicit instructions regarding the best methods for handling trees, we refer our patrons to Prof. E. J. Wickson's book, "California Fruits and How to Grow Them."

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

Roses.

Our stock of roses for this season is exceptionally fine. Our plants are all grown in the open ground; are strong, healthy and well rooted, and will flower profusely the first season after planting. We are giving special attention to this, the most popular of all flowers, and are constantly importing the new varieties, but do not offer them to our patrons until tested in our experimental grounds, and know that they are worthy of cultivation. **For list of varieties grown by us and descriptions of same refer to our descriptive catalogue.**

New Roses.

PRICE—35 cents each; \$3 per 10; \$20 per 100. Standards, \$1.25.

General Collection of Roses.

PRICE—25 cents each; \$2 per 10; \$15 per 100. Standards, \$1 each.

The following collection of ten popular varieties for \$1.75. The full collection only offered at this price.
